

भारतीय प्रबंध संस्थान बेंगलूर INDIAN INSTITUTE OF MANAGEMENT BANGALORE

# Executive Management Training Programme Leading Digital Transformation (LDT) Certificate Programme

#### **OVERVIEW**

Leading digital transformation requires both an understanding of technologies driving the change, as well as the ability to lead the organisational transformation. A robust business model that is built on top of the technology is therefore the key to digital transformation and sustained value creation.

The companies can choose to develop new technologies with the customer needs in mind or build a product/ services and a business model with improvements to existing technologies. What approach should one adopt? This programme opens one's mind to the different possibilities and provides a framework to analyse and come up with a blue print.

This programme has been conceived, designed and developed by IIMB in cooperation with FAU and Fraunhofer IIS to address the question of building transformational business models using technological advances.

	ABOUT THE PARTNER INSTITUTES
FRIEDRICH-ALEXANDER UNIVERSITÄT ERLANGEN-NÜRNBERG	Friedrich-Alexander Universität Erlangen-Nürnberg (FAU) The FAU is one of the strongest research universities in Germany and particularly stands out in the field of Engineering and Technology. Reuters Innovation ranks it the second most innovative university in Germany and sixth in Europe. QS World University ranks it as the institution with the most widely cited publications in Germany. FAU works with major international research institutions such as Helmholtz, Fraunhofer and Max Planck. FAU fosters and encourages transfer of scientific knowledge into practice.
Fraunhofer IIS	Fraunhofer Institute for Integrated Circuits IIS The Fraunhofer IIS is one of the world's leading application-oriented research institutions for microelectronics and IT system solutions and services. It ranks first among all Fraunhofer Institutes. With the creation of mp3 and the co- development of Advanced Audio Coding (AAC), Fraunhofer IIS has reached worldwide recognition. Fraunhofer IIS is actively involved in the development of digital solutions for reknown international industry partners.
भारतीय प्रबंध संस्थान बेंगलूर Indian INSTITUTE OF MANAGEMENT BANGALORE	Indian Institute of Management Bangalore IIMB has been ranked No. 2 in the India Rankings 2017 in the Management Education category under the National Institutional Ranking Framework (NIRF) by the MHRD. IIM Bangalore has strong focus on leadership and entrepreneurial skills that are necessary to succeed in today's dynamic business environment. With a faculty body from amongst the best universities worldwide, Indian Institute of Management Bangalore is fast emerging as a leader in the area of management research, education and consulting. IIMB has been ranked among the Top-70 global schools by the Financial Times Executive Education Rankings 2017.

## NEW BUSINESS REALITIES: NEW COMPETENCIES

For sustained business success, it is imperative that the businesses of tomorrow embrace technological challenges. Advances in computing technologies have made big data analytics accessible to every corporation across the globe. Falling data access and storage costs, maturation of IT security and cloud computing, and the ability to organize information using the blockchain has spawned the emergence of a lot of innovative business models. In addition, global corporations are waking up to the promise held by advances in automation and Robotics, Artificial Intelligence, Machine Learning, and Industrial Internet of Things. Smart products have already begun reaching consumer homes, and it is not long before they cease to be sources of competitive advantage for established corporations.

This emerging context requires that their leaders not only understand, but are able to leverage these technologies in their customer value propositions. It is also important that these leaders enable a culture of business transformation in their organizations. Given the evolutionary nature of these technologies, it is imperative that leaders cannot continue to work in their organizational/ industry silos, but be able to innovate and co-create with the help of the entire ecosystem.

#### **KEY TAKEAWAYS**

The programme is structured around 5 key pillars.

- 1. The technology behind Digital Transformation: Participants get an insight into various disruptive technologies at the core of digital transformation.
- 2. Value creation through Innovative Business Models: This module will focus on how to build value around some of the underlying technological building blocks, including cocreation and open innovation methods.
- 3. Intrapreneurship: Case studies on how large and mature organizations have created entirely new lines of business by setting up a new culture of innovation and intrapreneurship.
- 4. Business Plan: Participants would create a business plan to lead digital transformation in their own companies.
- 5. Strategic thinking and leadership: Developing strategic thinking and the ability to lead self and others through complexity and change.

# Industry 4.0 drives efficiency in manufacturing

A factory of a globally leading luxury vehicle manufacturer, the supply chain of a large automotive parts manufacturer and the countrywide operation of a network of windmills in Germany have something in common. They all have integrated their production resources with their workforce, resulting in a sociocyber physical system (S-CPS) that incorporates technologies like the Internet of Things (IoT), Big Data, Artificial Intelligence as well as social and organizational characteristics of plant workers, managers, and decision-makers to develop an integrated resource cockpit. Along with the process automation, the enhances effectiveness cockpit and efficiency of operations by optimally matching personnel resources with tasks, predicting future maintenance requests, and identifying bottlenecks, failure points and avenues for innovation. The digital transformation as part of the "Industry 4.0" initiative is only possible through leadership and management that demonstrates a thorough understanding of the impact and capabilities of the underlying technologies and their application in specific organizational contexts.

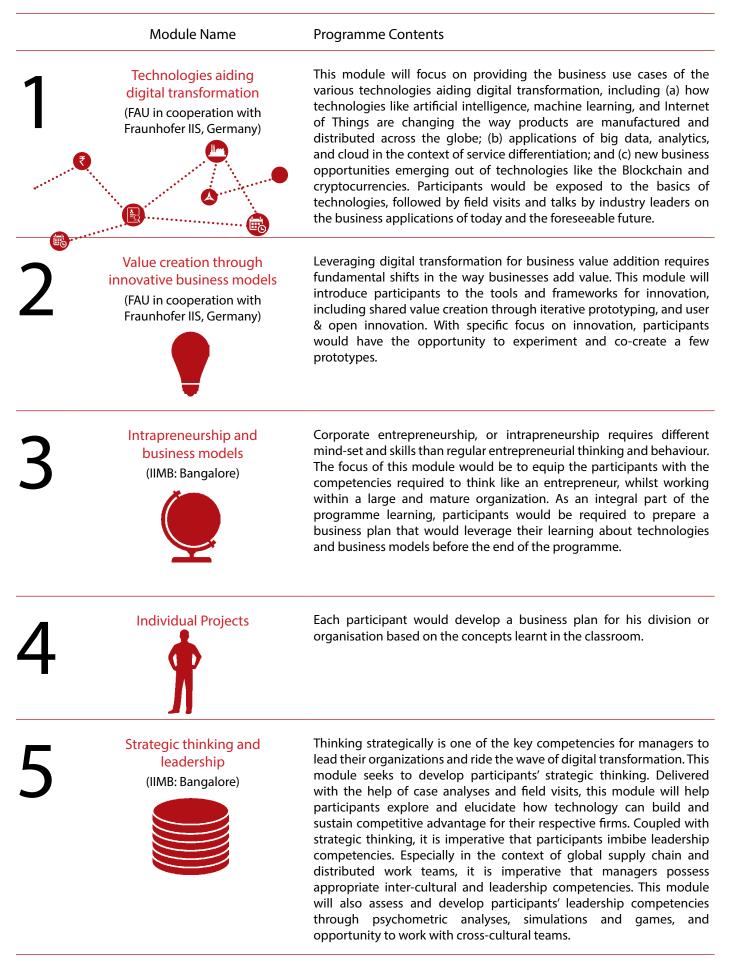

and the second

#### Data drives business

Everv industrial environment can generate а significant amount of data from several operating machinery at various levels of detail, such as energy consumption, levels of liquids necessary for the machines to operate, number of manufactured pieces, etc. By capturing this data in a more extensive management system and linking it with other business processes and tools, new services can be envisioned and designed, to either generate new revenue streams or optimize and improve existing processes. In this context, a German industrial grease cartridges manufacturer has leveraged an industrial cloud infrastructure computing to connect its machines and develop a solution for storing and pooling data, thus opening up new business potential and allowing accessibility for multiple stakeholders within and outside their organization to participate in the value co-creation processes. The manufacturer can then implement and deploy new methods such as data analytics, data visualization, and business intelligence to generate new outcomes that will not only impact its value delivery but also affect its partners' business models.

# Blockchain reduces costs and increases speed

Blockchain, the technology behind the cryptocurrency Bitcoin is much more potent than most people organizations understand. and Blockchains could be used to organize information and data in a much more collaborative and secure manner than what was available. Blockchain applications in an insurance aggregator in India has resulted variety of benefits, including significant reduction of time to verify and authenticate transactions, resolve disputes, and ensuring guicker delivery of products and services to its Blockchain, clients. through removal of intermediatires has also significantly reduced costs and eliminated inefficient processes. Given the inherent security features of the system, blockchain applications have reduced risks of data sabotage as well as unintended tampering, leading to higher trust and credibility. It has provided for creation and leverage of entirely new businesses and revenue streams for the insurance aggregator.

#### TARGET AUDIENCE PROFILE

CEOs, CXOs, COOs, Vice-Presidents, General Managers, Business Heads and Entrepreneurs.

## **PROGRAMME SCHEDULE**

	Week 1 (6 Day)	Week 2 (6 Day)	Week 3 (3 Day)
Dates	February 18-23, 2019	April 29 - May 4, 2019	July 1-3, 2019
Venue	IIM Bangalore	FAU/Fraunhofer IIS	Indian participants will come to IIM Bangalore and German participants will join virtually.
Days	Monday - Saturday	Monday - Saturday	Monday - Wednesday

ALUMNI Participants completing the Programme will be a part of the world-class Alumni network of IIM Bangalore and FAU.

## PROGRAMME FEE

The tuition fee covers all instruction during the three modules; required books and other pedagogical materials including self-learning materials; coaching, tutoring and other inter-modular support. Programme fee does not include the travel and living expenses for the three modules.

Programme fee is € 7900 + VAT per participant which is payable in two instalments as per the schedule indicated below:

€ 4200 + VAT	1 <sup>st</sup> Instalment on or before 23 February 2019
€ 3700 + VAT	2 <sup>nd</sup> Instalment on or before 20 April 2019

## **SELECTION CRITERIA**

Participants will be selected based on professional achievement, work experience, and organizational responsibility.

## AWARD OF CERTIFICATE

CUDELEICI

Upon completion of the programme, participants will be awarded a joint certificate of completion from the partner institutes IIM Bangalore and FAU.

# IMPORTANT DATES

Programme Start Date: 18 February 2019

Application Deadline: 15 December 2018

Release of first Shortlist: 20 December 2018

#### REGISTRATION

The organizations interested in nominating their employees and individuals interested in the Programme may apply online.

Aida Boukhris Chair of Information Systems, Innovation and Value Creation Friedrich-Alexander University, Erlangen- Nuremberg Lange Gasse 20, 90403 Nuremberg

Phone: +49 (0)911 5302 96399 Fax: +49 (0) 911 5302-155 Email: contact@ldt-fau.de Web: www.ldt-fau.de

Participants interested in the Programme may contact FAU at the above-mentioned address for clarifications, if any. Once registration is accepted, cancellation /refund queries and requests will not be entertained.
